Subject Index

Al phytotoxicity, C, Al, Fe balance, podzolization, intensive and extensive soil management, reversion of nature processes, 57
Alcohol, lead in blood, smoking, urban men, 23
Amalgam fillings, mercury concentration, brain, kidney, pituitary gland, 101
Ambient air, blood, children, emissions, lead, 301
Amphibians, genotoxicity, waste water, industrial effluent, micronucleus assay, in vivo genotoxicity, aquatic genotoxins, 249
Antartica, heavy metals, representative fauna, 281
Apportionment, lead, house dust, microanalysis, 183
Aquatic genotoxins, genotoxicity, waste water, industrial
effluent, micronucleus assay, in vivo genotoxicity, amphibians, 249
Atherosclerosis, cadmium, 31
Atmospheric fluxes, heavy metals, riverine fluxes, watershed, 289
Atomic absorption spectrophotometry (AAS), macro- and micro nutrients, lead, cadmium, freshwater fish, biological material, Bangladesh, 117
Atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, cadmium, marine fish, biological material, Bay of Bengal, Bangladesh, 223

Bangladesh, atomic absorption spectrophotometry (AAS), macro- and micro nutrients, lead, cadmium, freshwater fish, biological material, 117
Bangladesh, atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, cadmium, marine fish, biological material, Bay of Bengal, 223
Bay of Bengal, atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, cadmium, marine fish, biological material, Bangladesh, 223
Biofilm, growth, DNA synthesis, [^{3}H]thymidine, river, 161
Biological material, atomic absorption spectrophotometry (AAS), macro- and micro nutrients, lead, cadmium, freshwater fish, Bangladesh, 117
Biological material, atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, cadmium, marine fish, Bay of Bengal, Bangladesh, 223
Biomass fuels, fluorescence, polycyclic aromatic hydrocarbons, liquid chromatography, indoor air pollution, 77
Blood, ambient air, children, emissions, lead, 301
Brain, mercury concentration, amalgam fillings, kidney, pituitary gland, 101

C, Al, Fe balance, podzolization, Al phytotoxicity, intensive and extensive soil management, reversion of nature processes, 57
Cadmium, atherosclerosis, 31
Cadmium, atomic absorption spectrophotometry (AAS), macro- and micro nutrients, lead, freshwater fish, biological material, Bangladesh, 117
Cadmium, atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, marine fish, biological material, Bay of Bengal, Bangladesh, 223
Cadmium, house dust, copper, lead, zinc, 1
Caesium, desorption, exchangeability, soils, 271
Caesium, transfer factor, surface soil, 309
Caesium-137, faeces, model validation, peatlands, sheep, 91
Children, ambient air, blood, emissions, lead, 301
Copper, house dust, cadmium, lead, zinc, 1

Dependence on methods of preparation, fluoride and tea, fluoride ingestion through tea, 213
Desorption, caesium, exchangeability, soils, 271
DNA synthesis, biofilm, growth, [^{3}H]thymidine, river, 161
Dust, trace elements, pollutants, inductively coupled plasma/mass spectrometry, 207

Emissions, ambient air, blood, children, lead, 301
England, *Lutra lutra*, otter, PCBs, pesticides, 147
Exchangeability, caesium, desorption, soils, 271

Faeces, caesium-137, model validation, peatlands, sheep, 91
Flow velocity, moisture flow, salt movements, unsaturated zone, 235
Fluorescence, polycyclic aromatic hydrocarbons, biomass fuels, liquid chromatography, indoor air pollution, 77
Fluoride and tea, fluoride ingestion through tea, dependence on methods of preparation, 213
Fluoride ingestion through tea, fluoride and tea, dependence on methods of preparation, 213
Forest, soil, migration, radionuclide, technetium, 169
Freshwater fish, atomic absorption spectrophotometry (AAS), macro- and micro nutrients, lead, cadmium, biological material, Bangladesh, 117

Genotoxicity, waste water, industrial effluent, micronucleus assay, in vivo genotoxicity, amphibians, aquatic genotoxins, 249
Growth, biofilm, DNA synthesis, [^{3}H]thymidine, river, 161

Heavy metals, Antartica, representative fauna, 281
Heavy metals, atmospneric fluxes, riverine fluxes, watershed, 289
Heavy metals, soil contamination, polycyclic aromatic hydrocarbons, vehicle emissions, roadedge soil, 47
Herbicide adsorption, montmorillonite, kaolinite, immunoassay, 317
House dust, cadmium, copper, lead, zinc, 1
House dust, lead, apportionment, microanalysis, 183

Immunoassay, montmorillonite, kaolinite, herbicide adsorption, 317
In vivo genotoxicity, genotoxicity, waste water, industrial effluent, micronucleus assay, amphibians, aquatic genotoxins, 249
Indoor air pollution, fluorescence, polycyclic aromatic hydrocarbons, biomass fuels, liquid chromatography, 77
Inductively coupled plasma/mass spectrometry, dust, trace elements, pollutants, 207
Industrial effluent, genotoxicity, waste water, micronucleus assay, in vivo genotoxicity, amphibians, aquatic genotoxins, 249
Intensive and extensive soil management, C, Al, Fe balance, podzolization, Al phytotoxicity, reversion of nature processes, 57

Kaolinite, montmorillonite, herbicide adsorption, immunoassay, 317
Kidney, mercury concentration, amalgam fillings, brain, pituitary gland, 101

Lead in blood, alcohol, smoking, urban men, 23
Lead, ambient air, blood, children, emissions, 301
Lead, apportionment, house dust, microanalysis, 183
Lead, atomic absorption spectrophotometry (AAS), macro- and micro nutrients, cadmium, freshwater fish, biological material, Bangladesh, 117
Lead, atomic absorption spectrophotometry (AAS), macro- and micronutrients, cadmium, marine fish, biological material, Bay of Bengal, Bangladesh, 223
Lead, house dust, cadmium, copper, zinc, 1
Lead-210, natural radionuclides, polonium-210, soils, vegetables, uranium processing mills, 37
Liquid chromatography, fluorescence, polycyclic aromatic hydrocarbons, biomass fuels, indoor air pollution, 77
Lutra lutra, otter, PCBs, pesticides, England, 147
Lutra lutra, otter, PCBs, pesticides, Wales, 127

Macro- and micro nutrients, atomic absorption spectrophotometry (AAS), lead, cadmium, freshwater fish, biological material, Bangladesh, 117
Macro- and micronutrients, atomic absorption spectrophotometry (AAS), lead, cadmium, marine fish, biological material, Bay of Bengal, Bangladesh, 223
Marine fish, atomic absorption spectrophotometry (AAS), macro- and micronutrients, lead, cadmium, biological material, Bay of Bengal, Bangladesh, 223
Mercury concentration, amalgam fillings, brain, kidney, pituitary gland, 101
Microanalysis, lead, apportionment, house dust, 183
Micronucleus assay, genotoxicity, waste water, industrial effluent, in vivo genotoxicity, amphibians, aquatic genotoxins, 249
Migration, soil, radionuclide, forest, technetium, 169
Model validation, caesium-137, faeces, peatlands, sheep, 91
Moisture flow, flow velocity, salt movements, unsaturated zone, 235
Montmorillonite, kaolinite, herbicide adsorption, immunoassay, 317

Natural radionuclides, polonium-210, lead-210, soils, vegetables, uranium processing mills, 37

Otter, *Lutra lutra*, PCBs, pesticides, England, 147
Otter, *Lutra lutra*, PCBs, pesticides, Wales, 127

PCBs, *Lutra lutra*, otter, pesticides, England, 147
PCBs, *Lutra lutra*, otter, pesticides, Wales, 127
Peatlands, caesium-137, faeces, model validation, sheep, 91
Pesticides, *Lutra lutra*, otter, PCBs, England, 147
Pesticides, *Lutra lutra*, otter, PCBs, Wales, 127
Pituitary gland, mercury concentration, amalgam fillings, brain, kidney, 101
Podzolization, C, Al, Fe balance, Al phytotoxicity, intensive and extensive soil management, reversion of nature processes, 57
Pollutants, dust, trace elements, inductively coupled plasma/mass spectrometry, 207
Polonium-210, natural radionuclides, lead-210, soils, vegetables, uranium processing mills, 37
Polycyclic aromatic hydrocarbons, fluorescence, biomass fuels, liquid chromatography, indoor air pollution, 77
Polycyclic aromatic hydrocarbons, heavy metals, soil contamination, vehicle emissions, road-edge soil, 47

Radionuclide, soil, migration, forest, technetium, 169
Representative fauna, Antartica, heavy metals, 281
Reversion of nature processes, C, Al, Fe balance, podzolization, Al phytotoxicity, intensive and extensive soil management, 57
River, biofilm, growth, DNA synthesis, [^{3}H]thymidine, 161
Riverine fluxes, atmospheric fluxes, heavy metals, watershed, 289
Road-edge soil, heavy metals, soil contamination, polycyclic aromatic hydrocarbons, vehicle emissions, 47

Salt movements, flow velocity, moisture flow, unsaturated zone, 235
Sheep, caesium-137, faeces, model validation, peatlands, 91
Smoking, lead in blood, alcohol, urban men, 23
Soil contamination, heavy metals, polycyclic aromatic hydrocarbons, vehicle emissions, road-edge soil, 47
Soil, migration, radionuclide, forest, technetium, 169
Soils, caesium, desorption, exchangeability, 271
Soils, natural radionuclides, polonium-210, lead-210, vegetables, uranium processing mills, 37
Surface soil, caesium, transfer factor, 309

Technetium, soil, migration, radionuclide, forest, 169
[^{3}H]Thymidine, biofilm, growth, DNA synthesis, river, 161
Trace elements, dust, pollutants, inductively coupled plasma/mass spectrometry, 207
Transfer factor, caesium, surface soil, 309

Unsaturated zone, flow velocity, moisture flow, salt movements, 235
Uranium processing mills, natural radionuclides, polonium-210, lead-210, soils, vegetables, 37
Urban men, lead in blood, alcohol, smoking, 23

Vegetables, natural radionuclides, polonium-210, lead-210, soils, uranium processing mills, 37
Vehicle emissions, heavy metals, soil contamination, polycyclic aromatic hydrocarbons, road-edge soil, 47

Wales, *Lutra lutra*, otter, PCBs, pesticides, 127
Waste water, genotoxicity, industrial effluent, micronucleus assay, in vivo genotoxicity, amphibians, aquatic genotoxins, 249
Watershed, atmospheric fluxes, heavy metals, riverine fluxes, 289

Zinc, house dust, cadmium, copper, lead, 1
